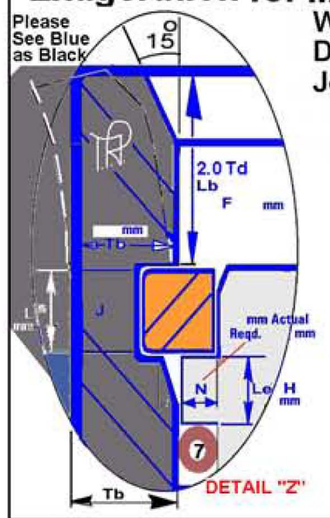
PED CONFORMITY

DECLARATION as required by the PED ESSENTIAL SAFETY REQUIREMENTS "ESRs" state at 2 Design, under 2.1 the use of "SAFETY COEFFICIENTS". As Euro Norm 5500, and harmonised pressure vesel code 13445 do not have proven safety coefficients to apply, NO ONE complies with ESRs.
Above statement applies to us also.
Any documents of conformity issued particularly to ISO 9001-2000 holders by "Notified Bodies", must be a fraud.
ALL Dampers are NON-CONFORMING

Exageration for Illustration of Fail Safe method.



Where Allowable Working Stress = S
Design Pressure P = MAWP + 10% + 15%
Joint Efficiency = E 0.7 RV RV Acc

We can not accept end user statement that design pressure is working presure

$$Td = \frac{\text{Design Pressure} \times \text{Radius Internal}}{S \times (\text{From Creep Test and to destruction 2000 Lbs In}^2) E - (0.6P)}$$

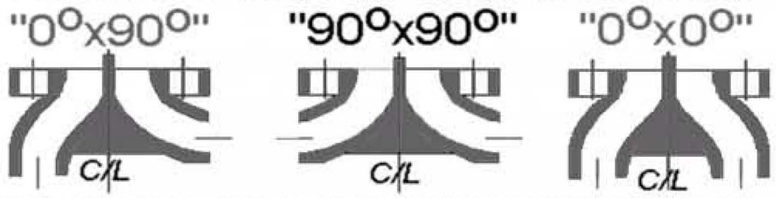
PulseGuard "Y-T" block, best flanging to system. In place of System "T", better flushing, & intercepts Pressure wave pulsation. Plain end, for socketing



Called - Weld connection angles to this system fitting C/L

PulseGuard "Top-Hat"
Allows flushing of pipe "crud" and pipe hydro-test before damper bolt on. May also replace damper during service.
